

General Characteristics of the PVC Pipe Cap, AuraPVC.

The AuraPVC Vent Cap is the perfect solution to exhaust and cap a schedule 40 or schedule 80 PVC Pipe.

The AuraPVC Vent Cap is perfect for ventilating vapors and particles from the PVC pipe. This Vent Cap can be used for both commercial and residential applications. It continually exhausts air with no moving parts, while preventing rain and snow from entering. The vertical louvers keep out insects and animals allowing for optimal air flow. In addition, the round design is aerodynamic to withstand wind speeds up to 200 mph. The AuraPVC Vent Cap is an excellent choice for exhausting gases and vapors.

For radon exhaust systems, the AuraPVC Vent Cap's superior exhausting optimizes the CFM for the in-line fans. As a result, this eliminates back pressure to the in-line fan traditionally caused by using T-Fittings or two 90 degree elbow fittings. In addition, this protects the fan from moisture damage caused by rain, snow, or ice entry. For environmental remediation systems, the AuraPVC Vent Cap can be used to cap the PVC pipes used to release vapors in numerous places. For instance, some places may include landfills, gas stations, contaminated soil sites, chemical containment bunkers and groundwater sites.

Product Applications of the PVC Pipe Cap, AuraPVC.

Ideal for PVC pipe, it can be used for both commercial and residential applications.

The AuraPVC Vent Cap can be used to cap PVC pipes used to release vapors in numerous locations such as landfills, gas stations, contaminated soil sites, chemical containment bunkers and groundwater sites.

Warranty of the PVC Pipe Cap, AuraPVC.

Manufacturer's Warranty: 1-Year
